<b>Office Action Summary</b>	<b>Application No.</b> 10/578,420	<b>Applicant(s)</b> KAMETAKA ET AL.	
	<b>Examiner</b> ALAN B. WAITS	<b>Art Unit</b> 3656	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Election/Restrictions***

1. Claims 9-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on May 8, 2009.
2. With regard to Applicant's assertion that no undue burden exists, the examiner disagrees. Group A is located in 384/544 while Group B is located in 29/898, thus causing a different field of search.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 recites the limitation "said wheel hub outer circumferential region".

There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Miyazaki et al. USP 6280096.

Miyazaki discloses a similar device comprising:

Re clm 7:

- An inner member (2, fig 1) including a wheel hub having an integrally formed wheel mounting flang (6, fig 1) at one end
- A cylindrical portion (8, fig 1) axially extending from the wheel mounting flange
- An inner ring (3, fig 1) fitted on the cylindrical portion
- An outer member (4, fig 1) arranged around the inner member
- Double row rolling elements (5, fig 1) freely rollably contained between the inner and outer member
- The inner ring being secured in an axial direction relative to the wheel hub by a caulked portion (19, fig 1)
- A chamfered outer circumferential surface (26, fig 1) of a back side of the inner ring

Re clm 8:

- The wheel hub is formed with an inner raceway surface (7, fig 1) on its outer circumferential surface and said wheel hub outer circumferential region from a base of the wheel mounting flange to the cylindrical portion through the inner raceway surface is to have a surface hardness of 54-64 HRC (col 7, lines 31-32)

- Said caulked portion remains as a non-quenched portion having a surface hardness less than 24 HRC (col 8, lines 27-29)

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toda USP 7125173, 6814495, 6619852 and Ouchi USP 6488589 each disclose a similar device.
